

## SS1100-HP AUTOMATIC PARTS WASHER FEATURES & BENEFITS

FEATURES	BENEFITS
Stainless-steel loading basket with finer grid	Prevents talll items from toppling over and smaller items from falling through.
Lid opens wider	Enables loading of heavier items with overhead cranes, forklifts etc.
Heavy-Duty loading capibilities	Can manage 45% more loading weight than a standard model
6 x spraybars	Covers every angle to ensure 100% cleaning coverage on top, side and bottom
Filters and valves on all spraybars	For regularly flushing dirt, and preventing blockages in the spray nozzles
100 x spray nozzles	Delivering a high volume of water to ensure optimum cleaning of every surface.
Auto top-up	Keeps the water tank topped up to prevent burning out the heating elements
Water level sensor	Protects the heating elements from burning out.
Pump hour meter	Ensures regular cleaning intervals are easy to follow.
Castor wheels with brakes	For easily moving the machine from point to point as and when required
2.2kw Ebara stainless-steel pump	For longer pump lifespan and superior cleaning power
Adjustable cleaning cycle timer	User-definable timer to ensure 100% cleaning of all parts
Emergency cut-off button	Ensures safety for the operator
AISI304 Stainless-Steel construction	Gives the machine a longer lifespan
Pump mounted on the exterior	Offers easier access for service and maintenance
Ergonomically designed lid handle	Offers an easier, safer method of opening and closing the machine
