CABINET WASHING MACHINE SERIES

HIGH PRESSURE HOT WATER WASHING SYSTEM

HIGH PRESSURE CABINET WASHING SYSTEM

HB1100

HB100 series cabin washing machines has been designed for cleaning of small, complex components with high pressured water.

The pump which operated by footswitch allows hands free cleaning; and provide better control to the operator.

The high flow rate pump allows outstanding performance for perfect cleaning results.

The heated water which heated by an efficient heating system is increasing washing quality. And insulated washing tank reduces energy consumption.

The washing cabin is well illuminated by a lamp; monitoring is provided through glass and an air jet cleaning system which ensures continuous excellent visibility during washing operation. The machine is also equipped with air gun for drying of the parts after washing. There are two stages filtering inside. First filtering has been done through to stainless steel basket filter can clean easily. Second filtering has been done by a filter has higher filtering capacity.

A digital display shows the operating temperature for optimal cleaning performance and Manometer shows pump pressure continuously.

TECHNICAL SPECIFICATIONS

HB1100

Dimensions working area (mm.)	1100x700	
Loading height of the part (mm.)	800	
Loading capacity (kg.)	100	
Tank capacity (lt.)	120	
Pressure pump (up to 60 bar)	55.0	
Pressure regulating valves	standard	
Manometer	standard	
Pump capacity	1 piece x 3,0 Hp	
Pump flow (lt / min)	14	
Heater (kW)	10	
Electric (V / phase / Frequency)	220-380-415 / 3 / 50 Hz-60 Hz	
Air supply (bar)	6-7	
Temperature	0-50°C	
Foot switch	standard	
High pressure water gun	standard	
Stainless steel filter basket	standard	
Air gun for drying	standard	
Interior Lighting	standard	
Air jet cleaning windows	standard	
Cleaning Wiper	optional	
Articulated upper cabin	optional	
Stainless steel body material	standard	
Magnetic Front Door Locking System	optional
