IRONMAN - Unmasked

Liquid hot tank alkaline paint stripper and booster additive.

Primary Application

IRONMAN – Unmasked is a concentrated specifically compounded blend of ingredients that penetrates, loosens and removes many of today's toughest synthetic finishes from metal surfaces. Finishes include vinyls, baked acrylics, epoxies, polyurethanes, alkyds, polyesters and melamines.

IRONMAN – Unmasked is used as both a paint stripper and booster additive with heavy-duty alkaline cleaners and hot tank caustic based strippers where improved performance is needed.

Chemical Characteristics

Chemical composition	:	blend of alkali, solvents, and surfactants
Physical form	:	as received: yellow liquid as used: pale-yellow solution
Odour	:	sweet
Specific gravity	:	1.048 at 20°C

Application Procedure

When used as a paint stripper the recommended concentration is 30-50% by volume in water.

When used as a hot strip or cleaner bath additive, use at 5-15% of the paint stripping solution. Operate at temperature from 70°C to 90°C with mechanical agitation to assure uniform, effective stripping or cleaning.

Safety and Handling Precautions

IRONMAN – Unmasked is a highly alkaline material. Direct contact may cause burns to eyes and skin. It is harmful if swallowed. Avoid contact with eyes, skin and clothing. Wear protective gloves, safety goggles and suitable protective clothing when handling. Do not take internally. Avoid breathing vapours or mist. Use with adequate ventilation.

First Aid

Eyes and Skin:	Immediately flush eyes or skin with plenty of water for at least 15 minutes. Get prompt medical attention.
Skin:	Remove contaminated clothing and shoes. Wash them before reuse.
If Swallowed:	Wash out mouth thoroughly with water. Give several glasses of water or milk to drink. Contact a physician immediately.

Keep out of reach of children.

Refer to Material Safety Data Sheet for Full Details.
