

SS1600-SD SLIDING DOOR AUTOMATIC PARTS WASHER FEATURES & BENEFITS

FEATURES	BENEFITS
Loading basket with finer grid	Prevents tall items from toppling over and smaller items from falling through.
Pneumatic sliding door	For safer, faster operation. Access for a loading trolley
Filters on spraybars	For regularly flushing dirt, and preventing blockages in the spray nozzles
120 x spray nozzles	Delivering a high volume of water to ensure optimum cleaning of every surface.
Auto top-up	Keeps the water tank topped up to prevent burning out the heating elements
Water level sensor	Protects the heating elements from burning out.
Pump hour meter	Ensures regular cleaning intervals are easy to follow.
Adjustable feet for uneven floors	For adjusting the alignment of the machine on an uneven surface
3.0kw Ebara stainless-steel pump	For longer pump lifespan and superior cleaning power
Adjustable cleaning timer	User-definable timer to ensure 100% cleaning of all parts
Emergency cut-off button	Ensures safety for the operator
AISI304 Stainless-Steel construction	Gives the machine a longer lifespan (Can be produced with Food Grade stainless)
Practical loading capabilities	Offers sufficient height for the taller objects that need cleaning
